

SAFEChecks' Secure Ordering Procedures

SAFEChecks is one of the only check manufacturer that established and strictly follows Secure Ordering Procedures, to prevent fraud in the ordering and delivery process.

- 1. On every new order, we always verify the name, account number, and shipping address with the bank, to make sure that the shipping address is legitimate.**
- 2. On every re-order with change of shipping address, we re-verify the shipping address.**
- 3. We confirm every regular re-order.**

While no program, policy or procedure is 100% foolproof, our Secure Ordering Procedures help prevent fraud attempts that might otherwise have been successful.
